Ohio Governor Mike DeWine recently signed House Bill 144, known as Keith's Law. This legislation allows people with disabilities to voluntarily be included in a communication disability database that is shared with the 9-1-1 system. This allows first responders to respond more effectively to people in need when dispatched.

Having this information will help increase safety and reduce misunderstandings during emergencies for both first responders and people with disabilities.

DODD will be adding resources to their website soon!
